

Innovative Security Solutions for More Secure Correctional Facilities

THE CHALLENGE:

Protect staff and visitors while maintaining a secure facility and a humane environment for inmates.

THE SOLUTIONS:

Prevent a crisis from occurring and protect everyone on the premises if such incidents were to transpire by employing best-in-class security solutions that enable correctional facilities officers to secure all buildings, monitor for threats, and alert emergency personnel in real-time.

SECURE

Maintain a secure and controlled facility with cutting-edge access control systems to prevent unauthorized personnel from entering or exiting the grounds, buildings, offices, floors, and any other enclosed areas.

MONITOR

Monitor activity using state-of-the-art CCTV systems and thermal imaging technology, which allow safety personnel to identify and track potential threats as they happen. Video analytic and thermal forensic solutions can then be used for in-depth analysis of the footage to prevent similar events from occurring.

ALERT

Mass notification and emergency communication tools enable security to notify everyone on the grounds of an incident through digital devices and intercoms while immediately alerting additional emergency personnel. Gunshot detection systems can also offer added support for immediate response.

TOP SOLUTIONS

- Personal identification
- Visitor management systems
- Door access
- Biometrics/facial recognition
- Gate control

TOP SOLUTIONS

- IP/Analog camera solutions
- Video management system solutions
- Video analytics
- Wireless transmission solutions

TOP SOLUTIONS

- Panic alarms
- Internal communication
- Two-way communication between law enforcement and site emergency
- Offsite system control
- Gunshot detection
